

E-101 Simplified Electrical Layout - Hospital

Areas: emergency department, ICU, operating rooms, patient rooms, imaging area, and nurse stations

Key drawing notes:

1. OR isolated power is supported by panel OR-ISO-1 with line isolation monitoring.
2. Generator GEN-EM1 backs emergency and critical circuits through ATS-1 and ATS-2.
3. The MRI requires a dedicated feeder from EQ-LP2 with isolated grounding requirements.
4. Change order CO-HOSP-004 adds backup power to the imaging wing including ATS tie-in and critica
5. Nurse call system emergency power is questioned in RFI-HOSP-033 and remains open pending owner
